

CMSB 2026 Lisbon - Programme									
Friday 24 July					Saturday 25 July				
8h45	Opening session - Pedro T. Monteiro								
9h00	Keynote speaker	Embedding Intracellular Logic into Agent-Based Models of Cellular Systems Anna Niarakis			Keynote speaker	An ecosystem of tools and applications of constraint-based modeling: from model reconstruction, prediction and optimization to AI integration Miguel Rocha			9h00
9h30									9h30
10h00									Coffee break
10h30	Session: Boolean and Qualitative Networks Chair: Anna Niarakis	Source-Target Control of Boolean Networks with Minimal Edge Perturbations Gustavo Magaña-López, Andrzej Mizera, and Jun Pang			Session: Constraint-Based Modeling and Molecular Computation	Inferring Minimal Culture Media using Biologically Constrained Combinatorial Optimization Moana Aulagner, Samuel Blanquart, and Anne Siegel			10h30
11h00		Modulation-Reaction Networks Leo Lobski and Yoav Montacute				On the Design of an Analog-Dyadic Converter CRN Mathieu Hemery			11h00
11h30		Inference of Qualitative Models from Steady-State Data via Weighted MaxSMT Ondřej Huvar, Nikola Beneš, Martin Jonáš, David Šafránek, and Samuel Pastva				Analog computation with transcriptional networks David Doty, Mina Latifi, and David Soloveichik			11h30
12h00		pyModRev: a Python Tool for Model Revision of Boolean Networks (tool paper) Pedro T. Monteiro and Filipe Gouveia				Metabolic Transformation Algorithm: A Systems Biology Approach to Aging and Alzheimer’s Disease Bruno Sá, Catarina Gomes, and Miguel Rocha			12h00
12h30									
13h00	Lunch				Lunch				13h00
13h30									13h30
14h00	Session: Rule-Based and Stochastic Models Chair: François Fages	Statistical model checking for rule-based models in the Kappa language Albin Salazar, Jérôme Feret, and Tatjana Petrov			Session: Causal Inference and Multi-Omics Integration	Metabolic Flux Inference in a Cheese Microbial Community via comFI: a Biology-informed Approach for Time-resolved Multi-omics Integration Sthyye Tatho, Valentina Baldazzi, and Simon Labarthe			14h00
14h30		Efficient Stochastic Trace Generation for Transcription Arman Ferdowsi, Matthias Függer, and Thomas Nowak				GRNgen: a Generator of Gene Regulatory Networks Fitting Graph and Motif Properties Alexandre Tan-Lhernould, Thierry Dorval, and François Fages			14h30
15h00		Mamdani-Driven Fuzzy Reaction Systems Linda Brodo, Moreno Falaschi, Fiamma Romagnoli, and Elisa B.P. Tiezzi				Consensus Enhances Individual Causal Models: a Use Case on Lung Cancer Driven by Cellular Pathways Arnaud Lang, Rodrigo Henrique Ramos, Safaa Al-Ali, Mohammad Reza Mousavi, Anna Calissano, and Irene Balelli			15h00
15h30		Incremental KaSa: Static Analysis of Kappa Models at Edit Time (tool paper) Rebecca Ghidini and Jérôme Feret				Coffee break			15h30
16h00		Coffee break & Poster session				Graph Learning Models for Temporal Gene Expression Prediction and the Role of Interactions Topology Alessandro Dipalma, Alessio Micheli, Paolo Milazzo, Francesco Simonetti, and Domenico Tortorella			16h00
16h30	Multi-view Clustering of Transcriptomics and Methyloomics Data Elucidates Glioma Molecular Stratification Carolina Pé-Curto, Roberta Coletti, and Marta B. Lopes					16h30			
17h00	Closing session Pedro T. Monteiro					17h00			
17h30									17h30
18h00									18h00
18h30					Walking tour Downtown Lisbon				18h30
19h00									19h00
19h30	Dinner Restaurante "Casa do Alentejo" Rua das Portas de Santo Antão 58, 1150-268 Lisboa								19h30
20h00									20h00
20h30									20h30
