

		CMSB 2026 Lisbon - Programme				
		Edifício II - ISCTE, Avenida das Forças Armadas, 1649-026 Lisboa, Portugal (Room B2.01)				
		Friday 24 July			Saturday 25 July	
8h45	Opening session - Pedro T. Monteiro					
9h00	Keynote speaker	Embedding Intracellular Logic into Agent-Based Models of Cellular Systems		Keynote speaker	An ecosystem of tools and applications of constraint-based modeling: from model reconstruction, prediction and optimization to AI integration	
9h30		Anna Niarakis			Miguel Rocha	
10h00	Coffee break				Coffee break	
10h30	Session: Boolean and Qualitative Networks Chair: Anna Niarakis	Source-Target Control of Boolean Networks with Minimal Edge Perturbations		Session: Constraint-Based Modeling and Molecular Computation Chair: Linda Brodo	Inferring Minimal Culture Media using Biologically Constrained Combinatorial Optimization	
		Gustavo Magaña-López, Andrzej Mizera, and Jun Pang			Moana Aulagner, Samuel Blanquart, and Anne Siegel	
11h00		Modulation-Reaction Networks			On the Design of an Analog-Dyadic Converter CRN	
		Leo Lobski and Yoāv Montacute			Mathieu Hemery	
11h30		Inference of Qualitative Models from Steady-State Data via Weighted MaxSMT			Analog computation with transcriptional networks	
		Ondřej Huvar, Nikola Beneš, Martin Jonáš, David Šafránek, and Samuel Pastva			David Doty, Mina Latifi, and David Soloveichik	
12h00		pyModRev: a Python Tool for Model Revision of Boolean Networks (tool paper)			Metabolic Transformation Algorithm: A Systems Biology Approach to Aging and Alzheimer's Disease	
		Pedro T. Monteiro and Filipe Gouveia			Bruno Sá, Catarina Gomes, and Miguel Rocha	
12h30						
13h00	Lunch				Lunch	
13h30						
14h00	Session: Rule-Based and Stochastic Models Chair: François Fages	Statistical model checking for rule-based models in the Kappa language		Session: Causal Inference and Multi-Omics Integration	Metabolic Flux Inference in a Cheese Microbial Community via comFI: a Biology-informed Approach for Time-resolved Multi-omics Integration	
		Albin Salazar, Jérôme Feret, and Tatjana Petrov			Sthyve Tatho, Valentina Baldazzi, and Simon Labarthe	
14h30		Efficient Stochastic Trace Generation for Transcription			GRNgen: a Generator of Gene Regulatory Networks Fitting Graph and Motif Properties	
		Arman Ferdowsi, Matthias Függer, and Thomas Nowak			Alexandre Tan-Lhernould, Thierry Dorval, and François Fages	
15h00		Mamdani-Driven Fuzzy Reaction Systems			Consensus Enhances Individual Causal Models: a Use Case on Lung Cancer Driven by Cellular Pathways	
		Linda Brodo, Moreno Falaschi, Fiamma Romagnoli, and Elisa B.P. Tiezzi			Arnaud Lang, Rodrigo Henrique Ramos, Safaa Al-Ali, Mohammad Reza Mousavi, Anna Calissano, and Irene Balelli	
15h30		Incremental KaSa: Static Analysis of Kappa Models at Edit Time (tool paper)			Coffee break	
		Rebecca Ghidini and Jérôme Feret				
16h00					Graph Learning Models for Temporal Gene Expression Prediction and the Role of Interactions Topology	
					Alessandro Dipalma, Alessio Micheli, Paolo Milazzo, Francesco Simonetti, and Domenico Tortorella	
16h30					Multi-view Clustering of Transcriptomics and Methyloomics Data Elucidates Glioma Molecular Stratification	
					Carolina Pé-Curto, Roberta Coletti, and Marta B. Lopes	
17h00	Coffee break & Poster session				Closing session & Best papers award	
					Pedro T. Monteiro	
17h30						
18h00						
18h30						
19h00						
19h30						
20h00	Dinner Restaurante "Casa do Alentejo" Rua das Portas de Santo Antão 58, 1150-268 Lisboa					
20h30
